

DEMO -- utilities for running demos / tutorials in Medley

includes

OPEN-URL (URL)
 (rename of ShellBrowse)
MEDLEY-CONTRIB (REPO)
 shows GitHub contributors to given repo
 uses ShellBrowse
BKSYSOBJ(string)

DEMO-*.TEDIT

contains scripts / TEDIT file talks
add your own

BKSYSOBJ is the start of a facility

(TEDIT.INSERT.OBJ (BKSYSOBJ "(CONS NIL)" (TEXTSTREAM(WHICHW))]

You should see (CONS NIL) in the TEDIT stream, clicking should shove (CONS NIL into an Interlisp exec, waiting for) or]. (probably the image objectg should be shaded, may also have to set the RDTBL flag on BKSYSBUF for strings, but this is a start).
