Subject: Converter for Xerox Bitmaps to X bitmaps. To: Lispusers↑.x cc: Rao.pa

 $\label{eq:constraint} $$ ERINYES < LispUsers>medley>xerox-to-xbm.lisp $$ ERINYES < LispUsers>medley>xerox-to-xbm.dfas1 $$ Constraints of the series of the$ 

I assume soon to trick to PHYLUM.

One function

(xerox-to-xbm outpath xerox-bm &optional name)

Generates a bitmap in the "include" format used by X applications. You can test these by making them into your background in X with:

xsetroot -bitmap outpath

-- Ramana
