This file includes notes on conventions for *Xerox LOOPS Users' Modules Manual*, Lyric Beta Release. This manual is packaged in one binder.

Writer: Raven Kontur Brewster

Printing Date: 22 February 1988

Directories and Files

The directory {ERIS}<Doc>Loops>Lyric>Beta>UserMods> contains the files for the manual. This directory has the following subdirectories:

 {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Z-ReleaseInfo> contains this file on writing conventions and a file on production details.

Filenames describe the contents of the file. For example, the filename

{ERIS}<Doc>Loops>Lyric>Beta>UserMods>LoopsMixin.tedit

contains the chapter on LoopsMixin.

Assemble the files in the following order for the manual:

{ERIS}<Doc>Loops>Lyric>Beta>UserMods>A1-TitlePage.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>A2-TOC.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>A3-Preface.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Converter.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>LoopsBackwards.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>LoopsMixin.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>LoopsMixin.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules-A1-TitlePage.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules-A2-TOC.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules-A3-LOF.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules-A3-LOF.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules1-Intro.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules2-Language.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules3-Use.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules3-Use.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules3-Use.tedit {ERIS}<Doc>Loops>Lyric>Beta>UserMods>Rules3-Use.tedit

Conventions

This manual uses the following conventions:

- Case is significant in Xerox LOOPS and Lisp. All selectors, methods, arguments, etc., must be typed as shown. Typically, this means that method names are capitalized and variables are not.
- Arguments appear in italic type.
- Selectors, methods, functions, objects, classes, and instances appear in bold type.

For example, a method appears as follows:

- (_ self Selector Arg1 Arg2)
- Examples appear in the following typeface:

89_(_LOGIN)

WRITER'S NOTES

- Methods with an exclamation mark (!) suffix usually perform operations deeply into class structure instead of only on a given object.
- Methods with a question mark (?) suffix usually are predicates; that is, truth functions.
- · Methods often appear in the form ClassName.SelectorName.
- · Cautions describe possible dangers to hardware or software.
- Notes describe related text.

Style Sheet Addenda

Here are some guidelines I used when writing the LOOPS manuals. Items appear in rather random order.

- Avoid contractions.
- Avoid subscripts. Use WORD1 rather than WORD1 to avoid inconsistent line leading.
- Avoid wording that starts "Note that..." or "Notice that...". Either make it a
 note with correct format or eliminate the "Note that".
- Use semicolons rather than m-dashes.
- Each item in the template starts with an initial capital letter; e.g., "Describes..."
- The arguments are identical in the call and in the argument description.
- Parenthesies appear around expressions and square brackets appear around the name of the functionality.
- The arrow in the expression is the NS character ←, not _. These characters appear similarly when printed, but differently on the screen. See the section, "Special Notes and Cautions," for details.
- A period appears after the word None, after argument descriptions, and Returns: item.
- Items are set to or return T (instead of true).
- · Menus contain options, not items or selections.
- You drag (not roll) the mouse to the right of a menu option to see its submenu.
- Use "above" and "below" when referrering to things in the same section, section numbers and names when referrering to things in the same chapter, and chapter numbers and names when referrering to things in another chapter.
- Please study the following stle sheet carefully before you start to edit. The various appearances of active value and annotated values are especially crazy making.

These things appear in **bold**: class variables functions instance variables messages methods variables ActiveValue - specific class/instance active value - general information activeValue - previous implementation of ActiveValue AnnotatedValue - data type AnnotatedValue - specific class annotated values - general information bitmap data type file package filecoms inspector Lisp Library package localState - instance variable non-NIL prettyprints supers list

Paragraph Formatting

The heading has the following format:

Paragraph-Looks Menu			
APPLY SHOW NEUTRAL			
Left Right <mark>Centered</mark> Justified <u>Page-Heading</u> type; {}			
Line leading: {4}pts Para Leading: {6}pts Special Locn: X {0}picas, Y {0}picas			
New Page ; Before After Display mode ; Hardcopy Keep ; Heading			
Tab Type: Left Right Centered Decimal Dotted Leader Default Tab Size: {}			
11.5			
11.5 26.0			
0 6 12 18 24 30 36 42			

The text the following format:

Paragraph-Looks Menu
APPLY SHOW NEUTRAL
Left Right Centered Justified Page-Heading type; {}
Line leading: {2}pts Para Leading: {10}pts Special Locn: X {0}picas, Y {0}picas
New Page: Before After Display mode: Hardcopy Keep: Heading Tab Type: Left Right Centered Decimal Dotted Leader Default Tab Size: {}
0.0
0.0
·

Page Layout

The starting page number varies with the package.

Page Layout Menu

Bitmaps, Graphs, and Sketches

Scale for bitmaps is 0.75.

Special Notes and Cautions

Make sure you have changed the underscore to be a left arrow before loading and printing any files. To do this,

- Enter the following commands into your Executive:

```
(GETCHARBITMAP (CHARCODE _) '(MODERN 10 MRR))(EDITBM IT)
```

- When the bitmap editor apears, delete the underscore and insert the following left arrow:

- Finally, enter the following commands into your Executive to store the pattern:

(PUTCHARBITMAP	(CHARCODE _)	'(MODERN 10 MRR) IT)
(PUTCHARBITMAP	(CHARCODE _)	'(MODERN 10 BRR) IT)
(PUTCHARBITMAP	(CHARCODE _)	'(TERMINAL 10 MRR) IT)
(PUTCHARBITMAP	(CHARCODE _)	'(TERMINAL 10 BRR) IT)
(PUTCHARBITMAP	(CHARCODE _)	'(TERMINAL 12 BRR) IT)
