LOOPSINDEX

By: sML (Lanning.pa@Xerox.com)

4-Sep-86

INTRODUCTION

LOOPSINDEX sets up the SINGLEFILEINDEX package to dump out classes, methods, and instances in an intelligible way. LOOPSINDEX can be loaded into any Interlisp sysout: you do not need to have Loops loaded to load LOOPSINDEX.

LOOPSINDEX adds appropriate entries to the lists SINGLEFILEINDEX.TYPES and SINGLEFILEINDEX.FILTERS to cause SINGLEFILEINDEX to index all classes, methods, and instances defined on a file. See the documentation of SINGLEFILEINDEX for a detailed description of these variables.

LOOPSINDEX will load SINGLEFILEINDEX if it is not already loaded.
