(NC.MakeFileBox

[LAMBDA (Card Title NoDisplayFlg ParamList InterestedWindow RegionOrPosition)

; Edited 5-Aug-88 15:43 by Trigg

; Make up a blank contents card, hook it to the user specified

; parent contents cards, and display it.

;; rht 12/2/84: In NoDisplayFlg case, changed to return ID rather than TextStream.

;; rht 12/8/84: Massive shaving. Took out code to force filing now (at creation time)

;; rht 9/11/85: Took out insertion of spacer when no markers.

;; fgh 11/13/85 Updated to handle Card object.

;; fgh 2/6/86 Chaged calls to NC.FetchDefaultHeight & NC.FetchDefaultWidth

;; fgh 2/6/86 Removed bug where NC.ClearMsg was deleting card immediately.

;; rht 4/11/86: Now passes Type and Window to NC.MakeTEditLeftMenu.

;; rht 8/2/86: Now lets NC.MakeTEditPropsList build the props to be passed to TEDIT.

```
;; rht 9/8/86: Now doesn't create window before calling TEDIT to avoid stupid prompt win popping up.
;; rht 9/19/86: Now applies supertype's MakeFn to cut out redundant code.
;; rht 11/10/86: Now passes NIL as title to Super's makefn.
;; rht 8/5/88: Added RegionOrPosition arg and passed to super's makefn. Also added ParamList and InterestedWindow args.
```

```

(NC.FileBoxCollectChildren

[LAMBDA (WindowOrTextStream Card NewChildren NoDisplayFlg) (* Randy.Gobbel " 2-Apr-87 15:38")

(* Ask user for new children (either cards or fileboxes) for this filebox.
Check to make sure that no circularities are introduced. This code is sort of the inverse of the NC.AddParents code and thus looks quite similar.)

(* rht 10/29/84%: Added NoDisplayFlg to prevent error message when no appropriate elements exist.
Also now returns ID if at least one child was added, NIL otherwise.)

(* fgh |11/13/85| Updated to handle Card object.)

(* rht 7/5/86%: Now checks for readonly cards.)

(* rht 8/11/86%: Added code to check to make sure that another operation is not in progress on this card when this fn is called.)

(* rht 10/17/86%: Made successful filing operations NOT do dismiss.)

(* pmi 12/5/86%: Modified message to NC.SelectNoteCards to mention SHIFT-selection.)

(* pmi 12/12/86%: Removed obsolete ReturnLinksFlg argument in call to NC.SelectNoteCards.)

(* rht 1/28/87%: Now activates parent box if necessary and saves before deactivating.)

(* rg |3/4/87| rewritten for new version of NC.ProtectedCardOperation)

(* rg |3/18/87| added NC.CardSelectionOperation wrapper)
