Notes on {Medley}<internal>test>

<test> subdirs:
admin, ARs, env, GC, IO , LANGUAGE, Library, loops, lyric, Maiko, tools
<test>Top level files
README.TEDIT (this file)
TEST-RESULTS (contains log from running AUTO tests from 1988)
DOT.read-me-first (originally .read-me-first)

<test>4045> Deleted

<test>Maiko>
Subdir AUTO, OBSOLETE
Top level files moved to OBSOLETE

STACKHAX (has CHECKSTACKSPACE, seems to get tangled up in it's own stack
STACKTAKESHI (seems to cause a stack overflow on opurpose, which leaves stack clean enough that URAID hard-reset recovers from. Suspect timeouts aren't correct
BAD-XREF (no compiled file)
display.cl (says "from Texas Instruments")
subdirs moved <ARs **optests** & .dfasl (**AuxHAND**
ENDLESSPUSHES AR-TEST-CASES.Auto-log

<test>Maiko>AUTO>
OPCODES.TEST
OPCODES.DFASL
may need EXPORTS.ALL to compile
most tests succeed
test BITBLT-DIAGONALS and BITBLT-SLOPED-LINES fail
A little hard to debug because the inspector for 2D
Another cop y of **bbtests** and **optests.lisp**

<test>Maiko>OBSOLETE>
Probably incorporated into AUTO>
AREF-TESTER
ARRAY-TESTER.TEST
FLOAT-TESTER
MAIKO-UNWIND-TESTS
TESTER (compiled OK)
unwindtest

xclopcodetests

<test>Library>
4045xlpstream> RS232 deleted
CASH-FILE> only hand
GCHAX>Auto>
HASH-FILE> only HAND
MatMult>Auto>
TEdit>Hand-Aux> samples to TEdit
WHERE-IS> only

<test>loops>
LOOPS-SETUP.TEDIT
LOOPS-TESTER-.... files

test>Lyric>
(old-versions of **DO-TEST .dfasl** and **.tedit)**

<test>Tools>
AUTOTEST.TEDIT (originql AUTOTEST.TEDIT-orig)
AUTOTEST & .DFASL framework for running tests

DO-TEST & .DFASL (copied newer version from Medley internal/library)
DO-TEST.TEDIT on Writing Software Tests
(many other files not reviewed yet)
