# Notes on {Medley}<internal>test>

<test> subdirs:

admin, ARs, env, GC, IO , LANGUAGE, Library, loops, lyric, Maiko, tools

<test>Top level files

**README.TEDIT** (this file)

**TEST-RESULTS** (contains log from running AUTO tests from 1988) **DOT.read-me-first** (originally .read-me-first)

<test>4045> Deleted

### <test>Maiko>

Subdir AUTO, OBSOLETE Top level files moved to OBSOLETE

**STACKHAX** (has CHECKSTACKSPACE, seems to get tangled up in it's own stack

**STACKTAKESHI** (seems to cause a stack overflow on opurpose, which leaves stack clean enough that URAID hard-reset recovers from. Suspect timeouts aren't correct

**BAD-XREF** (no compiled file)

display.cl (says "from Texas Instruments") subdirs moved <ARs optests & dfasl (AuxHAND ENDLESSPUSHES AR-TEST-CASES.Auto-log

<test>Maiko>AUTO> OPCODES.TEST OPCODES.DFASL

may need EXPORTS.ALL to compile most tests succeed test BITBLT-DIAGONALS and BITBLT-SLOPED-LINES fail A little hard to debug because the inspector for 2D Another cop y of **bbtests** and **optests.lisp** 

## <test>Maiko>OBSOLETE>

Probably incorporated into AUTO> AREF-TESTER ARRAY-TESTER.TEST FLOAT-TESTER MAIKO-UNWIND-TESTS TESTER (compiled OK)

# unwindtest xclopcodetests

#### <test>Library>

4045xlpstream> RS232 deleted CASH-FILE> only hand GCHAX>Auto> HASH-FILE> only HAND MatMult>Auto> TEdit>Hand-Aux> samples to TEdit WHERE-IS> only

<test>loops> LOOPS-SETUP.TEDIT LOOPS-TESTER-.... files

#### test>Lyric>

(old-versions of **DO-TEST** .dfasl and .tedit)

### <test>Tools>

**AUTOTEST.TEDIT** (original AUTOTEST.TEDIT-orig) **AUTOTEST & .DFASL** framework for running tests

DO-TEST & .DFASL (copied newer version from Medley internal/library)
DO-TEST.TEDIT on Writing Software Tests (many other files not reviewed yet)
